MESA

(Continued from Page Two.)

son. Mr. and Mrs. Korf spent several months at this place two seasons ago when they ran the Tent Photo Gallery. It is possible that they may return to this place later in the season and become permanent residents of Mesa.

RESIGNATION OF CITY ENGINEER SHIBLEY

WAS WITH RECLAMATION SERVICE FOR FIVE YEARS.

Came to Mesa to Work on Survey of Electric Car Line.

The resignation of City Engineer Kenneth Shibley will be presented to the next meeting of the city council for immediate action for the reason that Mr. Shibley has resigned his position with the Mesa Improvement society and will leave in a short time for California where he will make his home in the future.

Mr. Shibley came to Mesa about six months ago for the purpose of entering the employ of A. J. Chandler in the survey of the electric car line from this place to the Mesa Improvement company ranches south of town. The car line building as far as the survey is concerned has been completed and the work will go on interrupted by the matter of securing a right of way being the proposition which is now under way.

Mr. Shibley came to Arizona five years ago in the employment of the reclamation service. He was at first stationed at Roosevelt but for the past three years or prior to his coming to this place was stationed in the Phoenix office. Mr. Shibley has made many friends at this place as well as in his own profession on the coast. He left Mesa yesterday evening for Phoenix for the purpose of making arrangements for his departure for Los Angeles which will be his headquarters.

GRAND JURY WILL SIT ON GUN TOTER

PAYING OF FIDDLER WAS RATHER EXPENSIVE.

Four Boys Who Loaded Up on Saturday Night Conversation Water.

Homer Miller, the Papago Indian, who by flourishing a thirty-eight caliber six shooter pistol in the air in the vicinity of Lehi Sunday, thereby frightening some of the residents of that place, was yesterday arraigned in Justice Irwin's court and bound over to the next session of the grand jury in the sum of two hundred dollars bail. Miller is said, by his comrades, to be a good Indian, even when alive. He is said to be a hard worker and the father of two small children. The gun he used in his skirmishes Sunday was proven to have been empty at the time, although the men who were looking towards it were not in possession of those very important facts at the time. Miller did not have a great deal to say in his own defense and there were five witnesses from Lehi who told of his threatening attitude.

As a matter of fact, Miller was loaded to the guards with conversation water and was brave enough at the time to have contradicted his mother-in-law had she come within a hundred miles of the imaginary circle which he drew as a dead line around his barracks in the rich Lehi soil. Francisco Laastro and Jose Luna were convicted of selling liquor to Miller and his friends and they are in jail. The other members of the party got off with a disturbance charge and a fifteen dollar fine and now Miller will be at the mercy of the grand jury. A right good time the boys reported that they had had Saturday night and Sunday but this settlement with the musicians does come awfully high.

A Reliable Medicine—NOT A NARCOTIC

Mrs. F. Marti, St. Joe, Mich., says: "Our little boy contracted severe bronchial trouble and as the doctor's medicine did not cure him I gave him Foley's Honey and Tar in which I have great faith. It cured the cough as well as the choking and gagging spells, and he got well in a short time. Foley's Honey and Tar has many times saved us much trouble and we are never without it in the house." ENGLISH AS A WORLD LANGUAGE.

The necessity of providing some standard medium for education in the sciences and arts had long been pressing in China. A memorial of the ministry of education, on which the prince regent based his decree, expressly recognizes the inadequacy of Chinese to render technical and scientific terms, notes the incongruities which have arisen through the rivalries of foreign trained instructors, and says the time has come for uniformity.

English, it continues, was the first of foreign languages introduced into China; it is most widely used there and in the world. Most imported textbooks are in English. "It is, therefore, proposed that in the different schools teaching technical and scientific subjects, the English language be adopted. In the case of schools which do not now include foreign languages in the curriculum,

they must in the future be taught. The study of foreign languages is to be made compulsory in those schools where they are now optional.

"In all provincial high schools (scientific and technical) already existing or established in the future, the studies (with the exception of ethics, Chinese literature, history and geography) pertaining to science shall be taught in English. When the students are sent to Peking for final examination after graduation, they shall be examined through the medium of the English language."

Even now it is not uncommon to hear two Chinese from different provinces using English as a medium in conversation, for, although the written language is alike throughout China, the speech differs widely. The common knowledge of English may thus come in the future to play an important part in building up a national consciousness. It is generally recognized that the share of American missionary schools in preparing the way for this momentous decree has been very great.—The Churchman.
